

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A breathable, stretch-thinned film, comprising a breathable core layer coextruded between two outer skin layers, the core layer comprising:

a matrix polymer consisting of an ethylene homopolymer or copolymer, optionally in combination with a compatible olefin polymer or copolymer, wherein the ethylene homopolymer or copolymer comprises a single-site-catalyst-formed ethylene polymer;

a calcium carbonate filler; and

a polymer incompatible with the matrix polymer, wherein the polymer incompatible with the matrix polymer is present in the film in an amount less than an amount of the matrix polymer.

2. (Original) The stretch-thinned film of Claim 1, wherein the matrix polymer comprises a linear low density polyethylene.

3. (Original) The stretch-thinned film of Claim 1, wherein the matrix polymer comprises an ultra low density polyethylene.

4. (Original) The stretch-thinned film of Claim 1, wherein the polymer incompatible with the matrix polymer comprises a propylene polymer.

5. (Original) The stretch-thinned film of Claim 1, wherein the polymer incompatible with the matrix polymer comprises polypropylene.

6. (Original) The stretch-thinned film of Claim 1, wherein the polymer incompatible with the matrix polymer comprises a propylene-ethylene copolymer.

7. (Original) The stretch-thinned film of Claim 1, wherein the polymer incompatible with the matrix polymer comprises polystyrene.
8. (Original) The stretch-thinned film of Claim 1, wherein the polymer incompatible with the matrix polymer comprises nylon.
9. (Original) The stretch-thinned film of Claim 1, wherein the polymer incompatible with the matrix polymer comprises polyester.
10. (Currently Amended) The stretch-thinned film of Claim 1, wherein the ~~film~~ core layer comprises a laminate waste material which includes the polymer incompatible with the matrix polymer.
11. (Original) An absorbent article comprising the stretch-thinned film of Claim 1.
12. (Currently Amended) A breathable, stretch-thinned film, comprising ~~at least one layer, the layer including~~ a core layer coextruded between two outer skin layers, the core layer comprising:
 - between about 20% and 80% a matrix polymer consisting essentially of an ethylene homopolymer or copolymer, optionally in combination with a compatible olefin polymer or copolymer;
 - between about 20% and 80% a particulate inorganic filler; and
 - a laminate waste material including a polymer incompatible with the matrix polymer, wherein the layer includes between about 0.1% and 25% of the polymer incompatible with the matrix polymer.
13. (Original) The stretch-thinned film of Claim 12, wherein the matrix polymer comprises a linear low density polyethylene.

14. (Original) The stretch-thinned film of Claim 12, wherein the matrix polymer comprises an ultra low density polyethylene.

15. (Original) The stretch-thinned film of Claim 12, wherein the matrix polymer comprises a linear low density polyethylene and an ultra low density polyethylene.

16. (Original) The stretch-thinned film of Claim 12, wherein the polymer incompatible with the matrix polymer comprises a propylene polymer.

17. (Original) The stretch-thinned film of Claim 12, wherein the polymer incompatible with the matrix polymer comprises polypropylene.

18. (Original) The stretch-thinned film of Claim 12, wherein the polymer incompatible with the matrix polymer comprises a propylene-ethylene copolymer.

19. (Original) The stretch-thinned film of Claim 12, wherein the polymer incompatible with the matrix polymer comprises polystyrene.

20. (Original) The stretch-thinned film of Claim 12, wherein the polymer incompatible with the matrix polymer comprises nylon.

21. (Original) The stretch-thinned film of Claim 12, wherein the polymer incompatible with the matrix polymer comprises polyester.

Claim 22 (Canceled)

23. (Currently Amended) The stretch-thinned film of Claim 12, wherein the matrix polymer comprises between about 25% and 65% of the ~~film~~ core layer.

24. (Currently Amended) The stretch-thinned film of Claim 12, wherein the matrix polymer comprises between about 30% and 50% of the ~~film~~ core layer.

25. (Currently Amended) The stretch-thinned film of Claim 12, wherein the particulate inorganic filler comprises between about 35% and 70% of the ~~film~~ core layer.

26. (Canceled)

27. (Currently Amended) The stretch-thinned film of Claim 12, wherein the polymer incompatible with the matrix polymer comprises between about 1% and 20% of the ~~film~~ core layer.

28. (Currently Amended) The stretch-thinned film of Claim 12, wherein the polymer incompatible with the matrix polymer comprises between about 2% and 10% of the ~~film~~ core layer.

29-30. (Canceled)

31. (Original) An absorbent article comprising the stretch-thinned film of Claim 12.

32. (Currently Amended) A breathable laminate, comprising a breathable film including a breathable core layer coextruded between two outer skin layers, the core layer comprising:
 ~~a breathable film including~~ a matrix polymer consisting of an ethylene homopolymer or copolymer, optionally in combination with a compatible olefin polymer or copolymer, wherein the ethylene homopolymer or copolymer comprises a single-site-catalyst-formed ethylene polymer;
 a polymer incompatible with the matrix polymer; and

and a particulate filler, wherein the polymer incompatible with the matrix polymer is present in the film in an amount less than an amount of the matrix polymer; and the laminate further comprising a nonwoven web.

33. (Original) The breathable laminate of Claim 32, wherein the matrix polymer comprises a linear low density polyethylene.

34. (Original) The breathable laminate of Claim 33, wherein the matrix polymer further comprises an ultra low density polyethylene.

35. (Original) The breathable laminate of Claim 32, wherein the polymer incompatible with the matrix polymer comprises a propylene polymer.

36. (Original) The breathable laminate of Claim 32, wherein the polymer incompatible with the matrix polymer comprises polypropylene.

37. (Original) The breathable laminate of Claim 32, wherein the polymer incompatible with the matrix polymer comprises a propylene-ethylene copolymer.

38. (Original) The breathable laminate of Claim 32, wherein the polymer incompatible with the matrix polymer comprises polystyrene.

39. (Original) The breathable laminate of Claim 32, wherein the polymer incompatible with the matrix polymer comprises nylon.

40. (Original) The breathable laminate of Claim 32, wherein the polymer incompatible with the matrix polymer comprises polyester.

41. (Original) The breathable laminate of Claim 32, wherein the film comprises a laminate waste material which includes the polymer incompatible with the matrix polymer.
42. (Original) The breathable laminate of Claim 32, wherein the nonwoven web comprises a spunbond web.
43. (Original) The breathable laminate of Claim 32, wherein the nonwoven web comprises a meltblown web.
44. (Original) The breathable laminate of Claim 32, wherein the nonwoven web comprises an air laid web.
45. (Original) An absorbent article comprising the breathable laminate of Claim 32.
46. (Canceled)
47. (Previously Presented) The stretch-thinned film of Claim 12, wherein the matrix polymer comprises a single-site catalyst-formed ethylene polymer.
